Student & Freelance Designer

MY PERSONAL INTENTIONS

Being young and unexperienced makes me strive towards learning and experiencing new things. I see every opportunity of work as an inspiration for the future. I am therefore open and willing to work for a wide range of companies and organisations.

EXPERIENCE

My experiences range from creating digital art and communicating with clients. I am a motion and graphic designer, meaning that I produce both moving and still picture. I have made music videos and cover arts just to mention a few fields of mine. Since 2013 I have been working for both major companies and rather known EDM producers.

As a freelance designer I am used to plan ahead and adapt my way of working for different situations and purposes. As a busy graphic designer it has become a custom to communicate with a professional manner with my clients. A skill which is very necessary in my field.

JOBS

- Trainee - *Citygross Lund*
- Trainee - *Pizzeria Ministern*

WORKED FOR

- NoCopyrightSounds Ltd
- Alan Walker
- Toms Burkovskis

Résumé

Alexander Viala Bellander

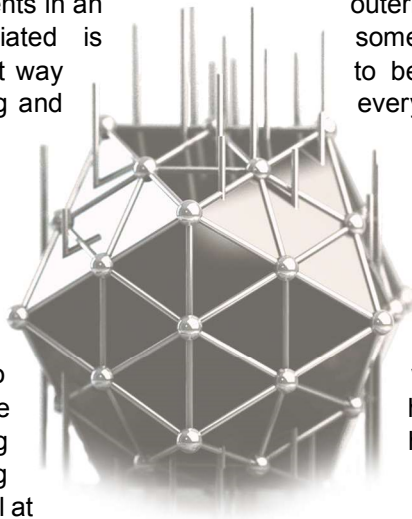

17 years old

Creative and happy, experience hunter

Dear potential employer! My name is Alexander and I am 17 years old. I am currently doing studies at Polhemskolan in Lund where I study Engineering Sciences. I am a glad and creative person who looks forward to new experiences. It is only by doing my best in which I will learn the most. You can count on me that I will do my best. Apart from my motivation for work it is worth to notice that I love communication. To speak, to write, to communicate in different manners is something I utterly enjoy doing. At the same time, it is something I do quite often. To communicate with my clients in an be accepted and appreciated is according to myself the best way nice and positive to anything and

outermost professional matter. To something I value quite a lot. And to be those things are by being everything.

During my spare time I do mood and what makes me right mood and by being does his best. I love speaking my girlfriend. I play basketball at when I am not social I work with design.

what puts me in the right happy. It is by being in the happy and positive that one with friends and being with least 3 times a week and

Since I consider myself a rather creative person I would like to conclude that I have an eye for solving problems in a creative way. I am used to follow orders, for example; when a client expresses that something I find worse looking looks better in his eyes, there is only one right thing to do and that is to do as he says. No questions asked. But that does not mean that I do not contribute with my ideas. If I believe that my idea can bring certitude to the environment, I will tell, but it is up to everyone else involved whether the idea is good or not.

In a nutshell I am a creative and smiling person, I love to communicate with people and to contribute for the better. I try to always do my best for everyone's best. It would be a pleasure of mine to speak more about myself in an interview to conclude whether I can contribute for the better in your environment!

Best
Alexander
